🪪 OBJECTIVE

My name is Samet Sunman and I am 25 years old. Technology have been in my life since I was a kid and I have always loved anything related with computer. I started to code and design at a very young age. Most of my skills and knowledge are selftaugh. I've studied Computer Engineering at Duzce University. During my study I was in Erasmus+ student exchange program at Lublin University of Technology in Poland for one semester. I have successfully completed all my courses and graduated. In the summer of 2017, I did my first internship at Boyner Büyük Mağazacılık A.Ş. in the information technology department as a software intern. In summer of 2018, I completed my second internship at General Mobile's mobile application development unit. Now I'm currently working at Ajans Press Group as a Software Developer since March 2019. I know C#, Java, Kotlin and Javascript languages. Also I've expeirence in .NET Core and React Frameworks
